Blake Andrew Swing

Gameplay Programmer

765-631-4416 | blake.a.swing@gmail.com | github.com/Sphinksz | https://www.linkedin.com/in/blake-swing/

PROFESSIONAL SUMMARY

Gameplay programmer using C++, C#, Lua, Unreal Engine 5, and Unity. Sole programmer for Brushfire, which finished in the top 20% of 33 IndieCade Climate Jam entries (6th overall). Extended SWGEmu's architecture to support ground and space zones.

TECHNICAL SKILLS

Programming languages: C++, C#, Lua, Python, Java, Unreal Blueprint
Game engines: Unreal Engine 5, Unity
Development tools: Git, GitHub, Microsoft Visual Studio, JetBrains Rider

EDUCATION

Indiana University Bloomington | Expected graduation: Spring 2029
Currently enrolled; Working on bachelor's in computer science and bachelor's in game design

PROJECTS -

Terra Forge - Independent Developer | 2026
- Developed real-time terrain previews in Unreal Engine 5 with assistance of prompt engineering; tested terrain authoring at world sizes up to 150 km and integrated terrain, water, region editing, and height- or region-based texturing into one plugin for world building directly inside Unreal Engine.

Brushfire - Sole Programmer | 2025
zygarde824.itch.io/brushfire
- Implemented combat and painting systems for a playable Unreal Engine demo within a 12-person development team.
- Delivered gameplay for Brushfire, which finished in the top 20% of 33 entries (6th overall) at IndieCade Climate Jam 2025.

Veltino Grove - Sole Programmer | 2024
hlim951.itch.io/veltino-grove
- Built a playable Unreal Engine cooking adventure with non-player character (NPC) interaction, ingredient collection, cooking, and karma systems.

EXPERIENCE

IndieCade | 2025-2025
Gameplay Programmer Intern
- Led a 12-person team and served as sole gameplay programmer for a game that placed 6th out of 33 entries in the IndieCade Climate Jam 2025.

IndieCade | 2024-2024
Gameplay Programmer Intern
- Served as project lead and sole gameplay programmer for a game jam project, overseeing development and implementing gameplay systems.

United States Army | 2013 - 2022
Explosive Ordnance Disposal (EOD) Team Leader
- Led a 2-person EOD team in high-pressure operations, coordinating technical tasks and communication.

SWGEmu and Empire in Flames | 2013 - 2021
Gameplay Programmer and Contributor | Remote
- Architected ground and space zone support by refactoring SWGEmu's quadtree-dependent systems around a shared Tree base type.
- Implemented SWGEmu's initial octree for Jump to Lightspeed space zones while retaining quadtree partitioning for ground zones.
- Tested affected in-game systems across the codebase to check compatibility after the spatial partitioning refactor.
- Resolved gameplay, networking, and scripting bugs in C++ and Lua; integrated fixes through Git branches, merges, and code discussions.
