Blake Andrew Swing

Gameplay Programmer

Broadway, NC | 765-631-4416 | blake.a.swing@gmail.com
github.com/Sphinksz | phoenixdevelopment.itch.io

PROFESSIONAL SUMMARY

Gameplay programmer using C++, C#, Lua, Unreal Engine 5, and Unity. Sole programmer for Brushfire, which finished in the top 20% of 33 IndieCade Climate Jam entries (6th overall). Extended SWGEmu's architecture to support ground and space zones.

TECHNICAL SKILLS

Programming languages: C++, C#, Lua, Python, C, Java, JavaScript
Game engines: Unreal Engine 5, Unity
Development tools: Git, GitHub, Microsoft Visual Studio, JetBrains Rider, Inkle
Gameplay development: Artificial intelligence (AI), user interface (UI), multiplayer networking, spatial partitioning, scripting, debugging, optimization, reverse engineering

PROJECTS

Terra Forge - Independent Developer | 2026

- Developed real-time terrain previews in Unreal Engine 5 with AI-assisted coding; tested terrain authoring at world sizes up to 150 km.
- Integrated terrain, water, region editing, and height- or region-based texturing into one plugin for world building directly inside Unreal Engine.

Brushfire - Sole Programmer | 2025

zygarde824.itch.io/brushfire

- Implemented combat and painting systems for a playable Unreal Engine demo within a 12-person development team.
- Delivered gameplay for Brushfire, which finished in the top 20% of 33 entries (6th overall) at IndieCade Climate Jam 2025.

Veltino Grove - Sole Programmer | 2024

hlim951.itch.io/veltino-grove

- Built a playable Unreal Engine cooking adventure with non-player character (NPC) interaction, ingredient collection, cooking, and karma systems.

EXPERIENCE

Personal and Academic Projects | 2004 - Present

Independent Game Developer | Remote

- Built playable Unreal Engine 5 and Unity prototypes to test game mechanics, AI behaviors, UI, and networking.
- Built a browser-playable interactive-fiction project with Inkle as a solo class assignment.

United States Army | 2013 - 2022

Explosive Ordnance Disposal (EOD) Team Leader

- Led a 2-person EOD team in high-pressure operations, coordinating technical tasks and communication.

SWGEmu and Empire in Flames | 2013 - 2021

Gameplay Programmer and Contributor | Remote

- Architected ground and space zone support by refactoring SWGEmu's quadtree-dependent systems around a shared Tree base type.
- Implemented SWGEmu's initial octree for Jump to Lightspeed space zones while retaining quadtree partitioning for ground zones.
- Tested affected in-game systems across the codebase to check compatibility after the spatial partitioning refactor.
- Resolved gameplay, networking, and scripting bugs in C++ and Lua; integrated fixes through Git branches, merges, and code discussions.

EDUCATION

Indiana University Bloomington | Expected graduation: Spring 2029

Currently enrolled; Computer Science and Game Development coursework
